

Program expansion

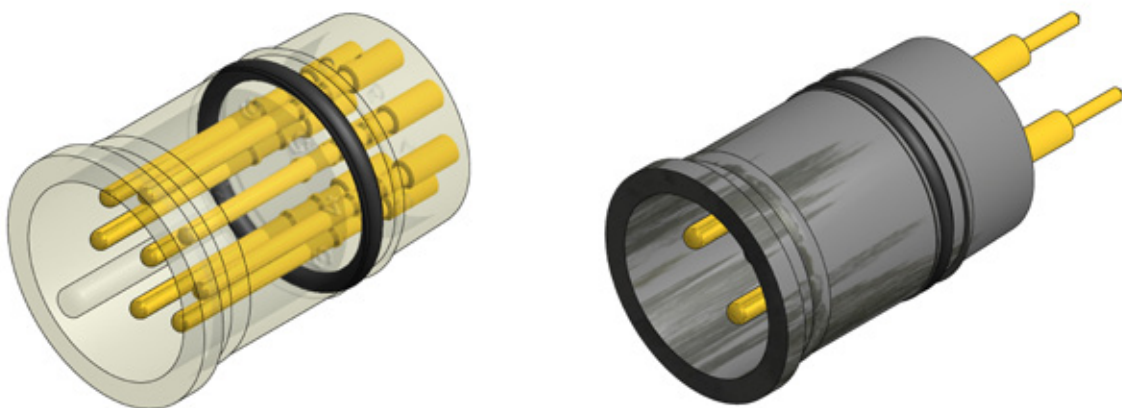

New panel plugs M12x1
for sensor and device installation

Sensor Actor Line: Panel Plugs M12x1

The existing M12x1 product family of panel plugs has now been expanded with 8-pole versions having PC tail contacts or solder contacts for stranded wire up to a maximum cross-section of 0.25 mm².

There are now also PC tail versions of the 4 and 5 pole components available.

The sealing to the housing or sensor tube is made by a surrounding radial, formed sealing lip on the contact carrier or alternatively by an O-ring.

Panel Plug, soldering version, transparent, 8-pos. Panel Plug, dip solder, black, 4- and 5-pos.
