Product Change Notification

PCN-no. A4440

Product: Flange Connectors

Date of Publikation:
2012-08-24

Product Specifications: N.A.

Description of Change: Material change (compound sealing)
old: blue
new: black

Type of Change: Minor (B) - change
No effect on application, usage nor working area. Change had been initiated for same base material. Only colour and supplier changed.

Reason of Change: Improvement to thermal characteristics
Optimizing production to first class finish result
Process security increased

Implementation date: Starting 01.08.2012 new product lines will be produced only with new compound sealing

Originator: Werner Schmidt, R&D-Manager

Customer information: Delivered and existing items with blue compound sealing are unrestrainedly workable.

According to existing stock, deliveries can still contain blue sealing compound flange connectors possibly.

Also we cannot avoid that even mixed deliveries can occur (blue and black compound sealing).

Conec will however, make sure that production series are different packed accordingly so that pack units should not contain mixed products.
